

Data Application FDZ Ruhr

Welcome to the FDZ Ruhr Data Request Centre at RWI!

With this online data request form, you can quickly and easily request "Scientific Use Files" from [our database](#) for scientific use. Please review our [terms of use](#) and answer all questions completely to ensure your data use agreement is processed efficiently.

Digital signature with DocuSign

The usage agreement can be signed entirely digitally via DocuSign, with no printing or mailing required. DocuSign is a secure, free online service that allows you to sign documents digitally and legally. Alternatively, you can print out the contract and return it by post. However, unlike the digital method, this will add the time it takes for the post to be delivered to the processing time. Please indicate your preference on the data request form.

Here's how the process works:

1. After submitting your application, you will receive an email from DocuSign with a link to the digital signing process (please check your spam folder).
2. Open the link and review the contract's contents.
3. You can then sign the document directly in your browser or via the app. Instructions are available in the attached video.
4. The signed document will then be sent to you and us via email.

Important notes:

- **Signature requirements:** All individuals using the data, including the contracting partner, must sign the agreement.
- **Providing email address(es):** To guarantee a smooth digital signing process via DocuSign, please only provide personal email addresses for the digital process (do not use distribution lists or shared mailboxes).

As a research data centre, we strive to operate as efficiently and sustainably as possible. By using DocuSign, we can process your data request **much faster** and **more efficiently**, while eliminating the need for **paper, printing and posting**. This enables us to actively contribute to sustainability.

We wish you the best of luck filling out the application!

(If you are interested in an on-site visit, please indicate this under 'additional comments' in your request.)
