## Abstract

This report gives a short description of the data set *Smaragd-Survey*. The data have been collected by a commercial market research institute, infas360. Infas360 conducts online surveys several times a year with about 10,000 participants. These surveys are distributed as “Casa Monitor” and focus on changing focus topics. The Smaragd-Survey is a subset of the Casa Monitor, *i.e.* three surveys which were conducted between February 2021 and January 2022. The questions cover experiences of the respondents with the Covid-19 pandemic, especially work from home and attitudes towards Covid-19 vaccination. This report describes the resulting data set in more detail.

# 1 Introduction

The *Smaragd-Survey* contains responses of three waves (February/ March 2021; July 2021; January 2022) of the “Casa Monitor” survey. The Casa Monitor is an online survey of about 10,000 people conducted several times a year. The surveys comprises a fixed basic section about the socio-economic and demographic background and a variable section which covers recent topics. The three waves, which are part of the *Smaragd-Survey*, centered around the Covid-19 pandemic, *inter alia* vaccine hesitancy, work-from-home, and in the third wave infection experience of the respondents (household). A remarkable feature of the data is the geographic information for the respondents which is the exact address and its corresponding neighborhood information.

The data collection of the variable part of the third wave was commissioned by the FDZ Ruhr at RWI, after the German Research Foundation (*Deutsche Forschungsgemeinschaft*, henceforth DFG) funded a research project on “Covid-19 as amplifier of social inequality-SMall ARea Analyses with German neighborhood Data” (henceforth SMARAGD). The Casa Monitor surveys are conducted by infas360 which is a leading German market research institute and data supplier. Infas360 provides small-scale, intra-municipal data based on administrative delimitations for the whole of Germany. This allows to merge the survey with extensive contextual information on very granular levels.

The report is structured as follows. Section 2 briefly describes the composition of the survey sample. Furthermore, we provide examples of the questions asked by wave in Section 3. The full questionnaires are reported in the Appendix.

## 2 Survey Sample

The sample of the Casa Monitor surveys is made up of target persons registered in advance in an online panel, who representatively reflect the German online population aged 18 and above. The duration of the online surveys varies up to a maximum of 20 minutes. Table 1 reports some descriptive statistics of the *Smaragd-Survey* by wave. The last column reports the corresponding information for Germany in 2021 from administrative sources to show that the survey data are representative for Germany. The first two variables give a small glimpse of the demographic composition of the sample which is very consistent for all three waves. The average age ranges between 48.90 and 50.22, though minimum and maximum realizations in the whole sample range from 18 to 91. The average ages of all waves are also very similar to the administrative German value<sup>1</sup>. The share of males<sup>2</sup> in the sample is also very constant across the three waves. It further deviates only by 0.02

---

<sup>1</sup>Mean age of the adult population was computed using data on age bins from [INKAR \(2022\)](#). The average age is computed as the average of all mid-ages per bin weighted with its population.

<sup>2</sup>Only in the third wave was it possible to deviate from the binary gender specification. Then, 0.16 percent indicated the gender “diverse”.

	W1		W2		W3		Germany
	Avg.	Std.Dev.	Avg.	Std.Dev.	Avg.	Std.Dev.

Table 1: Summary Statistics by Wave compared to German Admin. Data

from the administrative share<sup>3</sup>. To show the geographic coverage of the sample, the table also reports the share of respondents by federal state and wave. The data includes each federal state where each share is again relatively constant. The adult population shares from [Destatis \(2023\)](#) show that the survey has a similar geographic coverage compared to total Germany. Lastly, the table reports the number of observations by wave. Roughly 10,000 respondents participated in each wave, while the total adult population is around 70 million.

### 3 Question Focus (by Waves)

In this section, we briefly highlight some questions which are at the core of the survey. First, main variables, which are asked in each wave, are simply listed. Then, we report those questions, which were specific to the respective wave. The complete surveys of each wave are included in the appendix.

The survey questions on vaccination read as follows:

- Have you been vaccinated against the Corona virus?

<sup>3</sup>[Destatis \(2023\)](#) does not exactly differentiate by adult population and sex, therefore the male share includes 15 to 17 year-olds.

**Possible answers:** yes or no

- *Those who are not vaccinated, and are hesitant to get vaccinated, were asked*
  - Why do you not want to be vaccinated or why are you unsure whether you want to be vaccinated?

**Possible answers:** I am afraid of side effects; I am afraid of an allergic reaction to the vaccine; I don't know if the vaccine will work; I don't think I need a Corona vaccine; I don't like vaccines; My doctor hasn't advised me to get vaccinated; I will wait to see if the vaccine is safe and may get vaccinated afterward; I am concerned about the cost of vaccination; I don't trust vaccination; I don't trust the government; Vaccination goes against my religious beliefs; I am pregnant/breastfeeding/planning to get pregnant; Other (free text)

***Only in Wave 1 and 2, respondents could additionally select:*** I think others need the vaccination more urgently at the moment

***Only in Wave 3, respondents could additionally select:*** I'm waiting for long-term studies; I'm waiting for an inactivated vaccine to be approved

- ***Further question in Wave 2 and 3:***

Would you get vaccinated if you...

**Possible answers:** ...would have the chance to win 1 million euros in a “vaccination lottery” after vaccination; ...would no longer have to wear a mask after vaccination; ...would no longer have to observe the measures to contain the pandemic after vaccination

The survey questions on work-from-home – asked *only* in Wave 2 and 3 – read as follows:

- Does your job generally allow you to work from home (at least partially)?

**Possible answers:** yes or no

## Wave 1

Questions with respect to work-from-home read as follows:

- How has your work situation changed due to the Corona virus situation? Which applies to you?<sup>4</sup>

**Possible answers:** I am currently working unchanged from before the Corona pandemic; I am working entirely or mostly from home (in a home office); I am reducing overtime; I am working reduced hours; I am on unpaid leave (unpaid ordered leave); I have brought my leave forward by order; I have been placed on special leave with continued pay; I have been laid off

- *Those who work from home, were additionally asked*

---

<sup>4</sup>Similar question in [Wave 3](#).

- What is or was the average proportion of weekly working time in the home office?

**Possible answers:** integers only

- What is the maximum proportion of your weekly working hours that you could work in a home office? **Possible answers:** integers only

## Wave 2

Questions focusing on vaccinations in Wave 2 read as follows:

- Have you already made an effort to get an appointment for vaccination (e.g., got on the waiting list with your doctor, registered with the vaccination center, etc.)?

**Possible answers:** yes or no

- Would you like to have your child(ren) vaccinated?

**Possible answers:** Yes, as soon as this offer exists; Yes, but only if a corresponding recommendation (STIKO, federal government) is made; I have not yet decided whether I will have my children vaccinated; No

- *Those, who state to not want to have their children vaccinated or are unsure, are asked:*

- Why do you not want to have your child(ren) vaccinated or why are you unsure if you will have them vaccinated?

**Possible answers:** I am afraid of side effects; My child(ren) is too young to get vaccinated; I think vaccination is unnecessary because everyone else is getting vaccinated; I am afraid of an allergic reaction to the vaccine; I don't know if the vaccine will work; I don't think my child(ren) need a Corona vaccination; I don't like vaccinations for my child(ren); The pediatrician has not advised me to have my child(ren) vaccinated; I will wait to see if the vaccine is safe and may have my child(ren) vaccinated afterward; I think others need the vaccine more urgently right now; I am concerned about the cost of vaccination; I do not trust vaccination; I do not trust the government; Vaccination goes against my religious beliefs; Other (free text)

## Wave 3

An exemplary question on infection reads as follows:

- Have you, a family member or someone close to you been diagnosed with Corona infection?

**Possible answers:** No; Yes, myself; Yes, a member of my household; Yes, someone in my circle of acquaintances; Yes, someone at work or at school

Questions on vaccination in wave 3 read as follows:

- Have you had your children (between 12 and 17) vaccinated?

**Possible answers:** yes or no.

- Would you like to have your children under 12 vaccinated?

**Possible answers:** yes (as soon as possible), not yet decided, no.

- What were your motives for getting vaccinated?

**Possible answers:** For my own health protection; To protect others; Because I have high-risk patients in my environment; Because vaccinated people have more freedom; Because vaccination saves me tests: Out of societal pressure; Due to 2G regulations, I can no longer participate in life without vaccination; The high incidences have led me to vaccinate; I want to avoid possible mandatory vaccination; Other.

Questions on work-from-home are for example:

- How has your work situation changed due to the Corona virus situation? Which applies to you?

**Possible answers:** I am currently working unchanged, as before the Corona pandemic; I work entirely or mostly from home (in a home office); I work reduced hours; I have been laid off

## 4 Neighborhood characteristics

Through the address which is geo-coded and the respective geo-coordinate, it is possible to enrich the survey data with additional neighborhood information also provided by infas360. The data set is enriched by additional information on the residential building and the sociodemographic distribution within the city district of the respondent. These data comprise information on the respective city district like exact location, number of buildings (their types and size), households, residents (by age, migration status, employment status, education, occupation, ...), social stratum, heating type. Further, there is information on the residential building of the respondent regarding size and type of the building.

## 5 Data Access

The data set is registered at da/ra with a DOI (10.7807/smaragd:v1) by the Research Data Center Ruhr at RWI (FDZ Ruhr). The data set is available to the researchers involved in the funded project Smaragd. Further use is only possible through infas360.
